

# USER INTERFACE FOR DYNAMIC COMPUTING ENVIRONMENT USING ALLOCATEABLE RESOURCES

## ABSTRACT OF THE DISCLOSURE

5 The present invention discloses user interface for creating a dynamic  
computing environment using allocateable resources. The interface enables the fast, efficient  
selection and configuration of processing resources for the computing environment. The  
resources are fully selectable and allocable by a system architect. In a first embodiment, a  
primary company, Design2Deploy, Inc.® provides the ability for a customer or system  
architect to design a system by allocating resources and specifying how the resources are to  
10 be used. The system architect may create a computing environment from a remotely-  
accessible user interface such as a web page on the Internet. Thus, the system architect can  
create, modify and operate the environment from anywhere in the world.
